

Four Lines

David Rosenboom

Play with a sense of constant forward motion and intense concentration, while being subtle, energetic, contrasting, unpredictable and surprising.

Dynamics provide general guidelines only, and it is intended that articulations, dynamics, timbre, and tone quality transitions be shaped through improvisation in response to and in interaction with the electronic lines. These interpretations may be extreme. Open improvisations may be inserted according to agreements. Very short notes may be played pizzicato ad libitum. To synchronize precisely with the electronic tracks, a tempo of quarter note = 99.96 BPM is required. A 100 BPM approximation is usually acceptable.

Play with a sense of constant forward motion and intense concentration, while being subtle, energetic, contrasting, unpredictable and surprising.
